EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee. Since applicant did not traverse the restriction requirement of 05/10/05, the unelected method claims are hereby canceled.

The application has been amended as follows:

Claims 5-7 are canceled.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claims define a first roll and a second roll wherein each roll has a rib with a cutting blade and an abutment formed therein and the rib is projecting radially from the periphery of the roll. Also the distance between the rolls is adjustable. Buck (5,388,490) teaches adjusting the distance between two rolls, but does not teach ribs formed with a cutting blade and an abutment extending from the rolls. Muller (4,811,641) teaches rolls having a cutting blade and an abutment on the periphery from of the rolls, but doesn't teach a rib with the cutting blade and the abutment formed therein. Passafiume (4,279,369) teaches two rolls that have ribs extending from the periphery wherein the ribs have a resilient abutment and a non-resilient pusher, but does not teach a cutting blade. Guyer et al (3,020,809) teaches a cutting die that has abutments and cutting blades, but does not

teach ribs and does not teach rolls. It would not have been obvious to combine the references with other prior art teachings in order to meet the claim limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
